SUMMARY

Software Engineer with **4.5+ years of experience** architecting scalable SaaS and real-time applications. Specialized in **React.js, Next.js, and TypeScript**, with a strong focus on **frontend architecture, performance optimization, and system design**. Proven track record of leading end-to-end feature delivery, improving system performance by up to **60%**, and driving product impact across **AI, e-commerce, and blockchain** platforms. Experienced in **full-stack development** using **Node.js and NestJS** to deliver production-ready systems.

WORK EXPERIENCE

Codiste Private Limited

Software Engineer

Mar 2024 – Present

Ahmedabad, IN

Dialora.ai — AI Voice Call Automation SaaS

- Led end-to-end frontend architecture for **3 production applications** (marketing site, SaaS dashboard, admin panel), enabling the product to onboard paying customers within the first release cycle.
- **Reduced page load time from ~5s to ~2s** (60% improvement) using TanStack Query, code-splitting, and bundle optimization, improving conversion rates.
- **Contributed as a backend developer building APIs with ~40% performance improvement** by engineering NestJS services across user, auth, RBAC, analytics, onboarding, and campaign modules.
- Built and integrated backend systems including authentication, third-party APIs (Twilio, ElevenLabs, Pipedrive), and CI/CD pipelines on **AWS EC2 & Amplify** for reliable deployments.

Zo.me — AI Chat & Live Streaming Platform

- **Reduced page load time by ~40%** by profiling with React DevTools, eliminating re-renders, and implementing lazy loading and CSS optimization — improving retention on a real-time-heavy product.
- Delivered core engagement modules (AI chat, live streaming, voice recording, group creation) forming the primary user-facing value of the platform.

Hyundai Mexico 10th Anniversary App — Interactive 3D Web Experience

- Delivered a globally-deployed React + Three.js web app with real-time AI-driven 3D car customization, voting, and social sharing for Hyundai's anniversary campaign — optimized for smooth cross-device performance.

Telegram Mini-Games (Clickr.ai) — Tap-and-Play Gaming Platform

- Scaled the platform to **100k+ users** by designing a performant leaderboard and engagement system with real-time tapping logic, D3.js dashboards, and GSAP/Lottie animations.

Yudiz Solutions Limited

Frontend Engineer

Feb 2023 – Feb 2024

Ahmedabad, IN

Craftroots — E-Commerce Marketplace

- **Reduced initial page load time by ~35%** by implementing SSR and optimizing Apollo GraphQL data fetching, directly improving SEO rankings and organic discoverability.
- Delivered core e-commerce modules — authentication, product listing, checkout, wishlist, and user profile — ensuring a complete and reliable end-to-end shopping experience.

- Increased checkout reliability via Razorpay integration with robust error handling, advanced search filters, and pagination across the product catalog.
- Boosted frontend performance through lazy loading, code-splitting, and memoization, reducing user-perceived latency and improving retention.

Forgd (Tokenomics DAO) — Blockchain Platform

- Enabled non-technical users to configure complex token vesting schedules via multi-step Formik workflows with strong validation, reducing on-chain submission errors.
- Delivered real-time blockchain analytics dashboards (wallet balances, governance metrics), increasing live on-chain visibility and product engagement.

Azilen Technologies Pvt. Ltd.

Sep 2021 – Jan 2023

Associate Software Engineer

Ahmedabad, IN

EncorEstate Plans — Digital Estate Planning Platform

- Owned end-to-end frontend delivery — from authentication through plan management — using React.js, ensuring a seamless user journey across all critical workflows.
- Accelerated team feature velocity by building a reusable UI component library with theming and notifications, reducing redundant development effort across modules.
- Improved customer support response time by integrating Zendesk, and ensured smooth data flow by managing scalable API integration and application state across all modules.

TECHNICAL SKILLS

Frontend	React.js, Next.js, TypeScript, SSR/ISR, GraphQL, TanStack Query
Backend	Node.js, NestJS, Express.js, REST APIs, Prisma ORM
Architecture	Micro-frontends, Module Federation, Performance Optimization
Styling	Tailwind CSS, Material UI, Ant Design, SCSS
Databases	PostgreSQL, MongoDB, MySQL
DevOps	AWS Amplify, Docker, CI/CD, GitHub Actions
Testing & Tools	Jest, React Testing Library, Git, Jira, Agile/Scrum
Integrations	Stripe, Twilio, ElevenLabs, Pipedrive

EDUCATION

Bikaner Technical University <i>B.Tech in Computer Science CGPA: 8.1</i>	2018 – 2022
BTER Rajasthan <i>Diploma in Computer Science 73%</i>	2014 – 2017

ADDITIONAL

Certifications	React: The Complete Guide · Modern JavaScript & HTML/CSS (Udemy) JavaScript Algorithms & DS (freeCodeCamp) · Namaste React & Node (NamasteDev.com)
Awards	Synergic Force Award — Top Performer Recognition · Smart India Hackathon
Interests	System Design, Generative AI, AI Product Development, Open-Source, UX
